Abnormal Security provides the leading behavioral AI-based security platform that leverages machine learning to stop sophisticated inbound email attacks and dangerous email platform attacks that evade traditional solutions. The anomaly detection engine leverages identity and context to analyze the risk of every cloud email event, preventing inbound email attacks, detecting compromised accounts, and remediating emails in milliseconds—all while providing visibility into configuration drifts across your environment. You can deploy Abnormal in minutes with an API integration for Microsoft 365 or Google Workspace and experience the full value of the platform instantly. More information is available at abnormalsecurity.com."

Guardicore (now part of **Akamai**) provides organizations with the ability to see Application Behavior (process level), track Application Dependencies and prevent unauthorized Lateral Movement on endpoints and workloads running on bare metal, VMs, IaaS/DaaS, containers ... and very soon OT/IoT/IoMT assets.

Download "[The Forrester New Wave™: Microsegmentation](#)", which evaluated the nine providers that matter most, to see how each vendor scored against 10 criteria and where they stand in relation to each other.

Arctic Wolf creates a custom security strategy for your organization's specific needs. Through our concierge approach, we help you meet and maintain industry regulatory obligations. Learn how Arctic Wolf detects advanced threats and manages risks across healthcare, financial services, legal, manufacturing, government, and more.

Authomize empowers organizations to establish identity-first security by detecting, investigating, and responding to identity and access threats. Customers use Authomize to protect their cloud services and applications from account takeovers, privilege escalations and identity-based attacks. The platform provides unprecedented visibility and granular control across IaaS, SaaS, Data, and IAM infrastructure.

Alt try (Gal): Authomize enables customers to adopt identity-first security by detecting, investigating and responding to identity and access threats in order to get their IDENTITY (AuthN), ACCESS (AuthZ), and identity-driven security processes right. Our customers mitigate IAM risks and protect their cloud services and applications from account takeovers, privilege escalation and identity-based attacks across IaaS, SaaS, Data, and their IAM infra.

Cadre (www.cadre.net) is a network and information security solutions provider that serves large and medium sized firms. Widely recognized as a pioneer in the security industry, Cadre delivers value through superior customer service, advanced engineering and a resolute focus on design, assessment, installation, training and support of information security systems. All over the world, clients rely on Cadre to provide guidance and technical expertise on compliance, controlling technical risks, and achieving security goals.

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading provider of cyber security solutions to governments and corporate enterprises globally. Its solutions protect customers from 5th generation cyber-attacks with an industry leading catch rate of malware, ransomware and other types of attacks. Check Point offers multilevel security architecture, "Infinity" Total Protection with Gen V advanced threat prevention, which defends enterprises' cloud, network and mobile device held information. Check Point provides the most comprehensive and intuitive one point of control security management system.

Cyber Crucible is a cybersecurity Software as a Service company definitively removing the risk of identity & data extortion from customer environments. This is accomplished via our patent-pending, highly resilient, easily-deployed behavioral analysis Windows software. Cyber Crucible endpoint software provides identity theft prevention, data theft prevention, and data loss (aka, ransomware encryption) protection. This aligns with the three primary behaviors driving ransomware extortion attacks.

Deepwatch provides early detection and response to cyber threats together with tailored guidance from our experts to help you mitigate risk and improve your organization's security posture. We can support your security operations center (SOC) in full, or co-manage your SOC, stand up a new cloud-native SOC or help manage your EDR or VM solutions.

Cyberattackers have the advantage. **ExtraHop** is on a mission to help you take it back with security that can't be undermined, outsmarted, or compromised. Our dynamic cyber defense platform, Reveal(x) 360, helps organizations detect and respond to advanced threats—before they compromise your business. We apply cloud-scale AI to petabytes of traffic per day, performing line-rate decryption and behavioral analysis across all infrastructure, workloads, and data-in-flight. With complete visibility from ExtraHop, enterprises can detect malicious behavior, hunt advanced threats, and forensically investigate any incident with confidence. ExtraHop has been recognized as a market leader in network detection and response by IDC, Gartner, Forbes, SC Media, and numerous others.

When you don't have to choose between protecting your business and moving it forward, that's security uncompromised. Learn more at www.extrahop.com.

Gigamon helps the world's leading organizations run fast, stay secure and innovate. We provide the industry's first elastic visibility and analytics fabric, which closes the cloud visibility gap by enabling cloud tools to see the network and network tools to see the cloud. With visibility across their entire hybrid cloud network, organizations can improve customer experience, eliminate security blind spots, and reduce cost and complexity. Gigamon has been awarded over 75 technology patents and enjoys world-class customer satisfaction with more than 4,000 organizations, including over 80 percent of the Fortune 100 and hundreds of government and educational organizations worldwide. Headquartered in Silicon Valley, Gigamon operates globally. For the full story on how Gigamon can help you to run fast, stay secure and innovate, please visit www.gigamon.com and follow us on Twitter @gigamon.

At **Ideal Integrations**, our focus is to provide you with a sustainable competitive advantage through the strategic use of technology. We combine cutting-edge innovations with a creative and skilled team of engineers to deliver customized technology solutions to help your company succeed. Keeping cybersecurity in mind, Ideal Integrations created spin-off company Blue Bastion to address our client's Offensive and Defensive security needs. Whether through reducing the impact of cybercrime, strengthening the human firewall, enabling business growth without risk, or helping to solidify a brand's reputation in the market, the combined services of Ideal Integrations and Blue Bastion are unparalleled in the Pittsburgh market and beyond.

Inversion6 is a cybersecurity risk management provider that offers custom security solutions. We provide a full suite of information security services and solutions that help define cyber security strategy, identify and remediate threats and risks, select and deploy the right technology, and prepare and protect you from malicious attacks. From fractional CISOs to a full service MSSP, Inversion6 partners with you to protect your business at every level.

Mimecast: Work Protected™

Since 2003, Mimecast has stopped bad things from happening to good organizations by enabling them to work protected. We empower more than 40,000 customers to help mitigate risk and manage complexities across a threat landscape driven by malicious cyberattacks, human error, and technology fallibility. Our advanced solutions provide the proactive threat detection, brand protection, awareness training, and data retention capabilities that evolving workplaces need today. Mimecast solutions are designed to transform email and collaboration security into the eyes and ears of organizations worldwide.

Netskope, the SASE leader, safely and quickly connects users directly to the internet, any application, and their infrastructure from any device, on or off the network. With CASB, SWG, and ZTNA built natively in a single platform, the Netskope Security Cloud provides the most granular context, via patented technology, to enable conditional access and user awareness while enforcing zero trust principles across data protection and threat prevention everywhere. Unlike others who force tradeoffs between security and networking, Netskope's global security private cloud provides full compute capabilities at the edge. Netskope is fast everywhere, data-centric, and cloud-smart, all while enabling good digital citizenship and providing a lower total-cost-of-ownership.

Pondurance delivers world-class MDR services to industries facing today's most pressing and dynamic cybersecurity challenges including ransomware, complex compliance requirements, and digital transformation accelerated by a distributed workforce. By combining our advanced platform with our experienced team of analysts, we continuously hunt, investigate, validate, and contain threats so your own team can focus on what matters most.

Pondurance experts include seasoned security operations analysts, digital forensics and incident response professionals, and compliance and security strategists who provide always-on services to customers seeking broader visibility, faster response and containment, and more unified risk management for their organizations.

Seiso is an information security consulting company focused on creating simple, effective security programs designed to evolve and mature within organizations over time. Seiso delivers cloud, enterprise, and application security solutions, builds and operates security programs for the most challenging, fast moving, and heavily regulated environments, and provides expert guidance and advice. Seiso's approach focuses on harmony with the business, ensuring that security does not hinder organizational goals, and that its partners are able to make informed, risk-based decisions.

Sophos - At Sophos, we help organizations keep data safe and block the growing number of complex threats. We protect everywhere and offer complete security with our full range of endpoint, encryption, email, web, network security and UTM products. We help customers protect their businesses and meet compliance needs. And all our customers benefit from the expertise of our threat analysts located around the world. Their research is at the heart of everything we do. They quickly find the latest threats and update protection for our customers automatically. Plus, our support engineers are experts on all our products, and they're available whenever you need them. We make our products easy to install and use so you spend less time managing security. With Sophos you can focus on the needs of your business because we're securing your entire organization.

Spirion enables enterprises to easily and automatically discover any type of potentially sensitive personal data no matter where it lives in the IT environment. This enables faster and more accurate data discovery for context and risk. It identifies sensitive data with independently verified 98.5% accuracy and the lowest false positive rate in the industry, then automatically applies appropriate cures and controls.

Stratascale is an SHI company focused on Digital Agility and the ability to rapidly adapt your organization in response to changes & challenges through technology and innovation.

At Stratascale, the Cybersecurity practice of experts work with Fortune 500 organizations to align their cybersecurity stack with desired business outcomes by measuring the end-to-end effectiveness of the cybersecurity platform. Partnering with our customers we find success in approaching digitally agile cybersecurity begins with a focus on rationalizing and consolidating disparate technology to provide a more secure environment for infrastructure, data, and people.

Our cybersecurity services advise, architect, and implement security solutions across five critical areas:

- Identity & Access Management
- Data & Application Security
- Hybrid Cloud Security
- Security Program Strategy
- Security Operations

Built on vendor-independent approach, in-depth research and solutions capabilities across the technology spectrum help you remain ready, responsive, and resilient as cybersecurity threats and the regulatory landscape change. Tenable our vision is to "EMPOWER ALL ORGANIZATIONS TO UNDERSTAND AND REDUCE THEIR CYBERSECURITY RISK"

Cybersecurity is one of the existential threats of our time. New types of connected devices and compute platforms, from Cloud to IoT, have exploded the cyber-attack surface. And more tools collecting more data doesn't equate to actionable insight for the CISO, C-suite and Board of Directors. The old way of simply scanning on-premises IT devices for vulnerabilities is no longer enough. It's time for a new approach.

Today, over 30,000 organizations around the world rely on us to help them understand and reduce cybersecurity risk. Our goal is to arm every organization, no matter how large or small, with the visibility and insight to answer four critical questions at all times: Where are we exposed? Where should we prioritize based on risk? Are we reducing our exposure over time? How do we compare to our peers?

We are the Cyber Exposure Company

Established in 2007, **The Teneo Group** (www.TheTeneoGroup.com) is a cybersecurity engineering firm. TTG is a solutions integrator that designs, deploys and helps to manage our customers' network and information technologies. The Teneo Group provides service across a variety of industries, ranging from Fortune 500 companies, to local government organizations, to small private technology start-ups.

Servicing global clients from offices up and down the East Coast, the principals of The Teneo Group trace their roots for years in the industry, bringing together an uncommon breadth and depth of IT expertise. In addition to Check Point, has strong partnerships with Gigamon, Rapid7, VeloCloud, Unitrends, Ordr, Argon, RSA and others.
