

COMPANY	Confidential – Financial Services
JOB TITLE	Director – Head of Cyber Security Operations Center
COMPENSATION	~ \$250,000 DOE
LOCATION	Pittsburgh
HW Consultant Contact Details	Megan Calidonna 347-282-5738

Actively looking for a Director level candidate based out of Pittsburgh to lead the Cyber Security Operations Center for a Global Financial Services Organization.

This is a new position created to oversee the Security Operation Center (CSOC) reporting directly to CISO. You will have direct oversight of Incident Response, Counter Intelligence, Cyber Threat Intelligence, Detection and Monitoring teams which are rapidly growing throughout their multiple data centers. You will have a strategic, enterprise view of the organization and will work with the CISO and CIO to bring the security infrastructure to a mature state.

The ideal candidate will be local to Pittsburgh but we are happy to assist in relocation if needed. You will travel to other data centers throughout the year but travel is limited to 10%-15%. The Security team is growing by 75+ people this year, so this position is pure growth.

Key Responsibilities (not inclusive):

- Technical Leadership of the Security Monitoring team, driving the evolution of the Security Monitoring practice by an intimate knowledge of the SIEM technologies used and the security threat landscape.
- Day to day operations of the Security Monitoring practice, implementing and measuring a Quality Assurance and Constant Improvement methodology.
- Plan and organize daily SIOC operations, inspect staff execution of defined processes, and ensure complete and accurate reporting of key performance indicators (KPIs).
- Provide thought leadership on new capabilities required for effective SIOC operation by staying current with the latest attacker techniques and defensive countermeasures.

Key Essential Skills (not inclusive):

- Bachelor's degree and appropriate professional certifications required
- 10+ years working within Information Security / Cyber Security with specific experience within a Security Operations Center (SOC)
- Experience building out and growing a SOC
- Experience reporting and interacting with senior level stakeholders and board members
- Financial Services Experience is a plus, but not required
- Leadership experience of teams 5+
- Ability to think strategically
- Passion for keeping things secure
